

2022-02-03

Applies to: Activation of Alaska Prime / Evo air conditioning stations - first start-up.

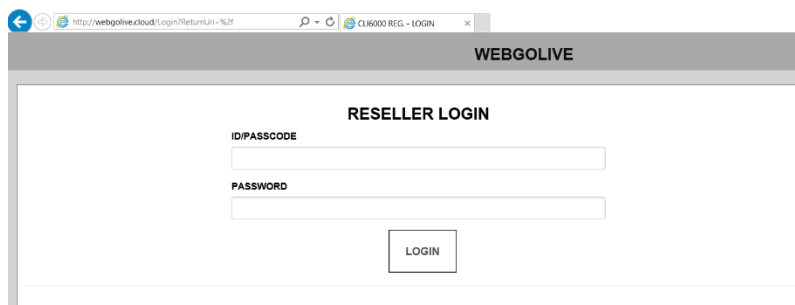

Devices can be started / activated in two ways:

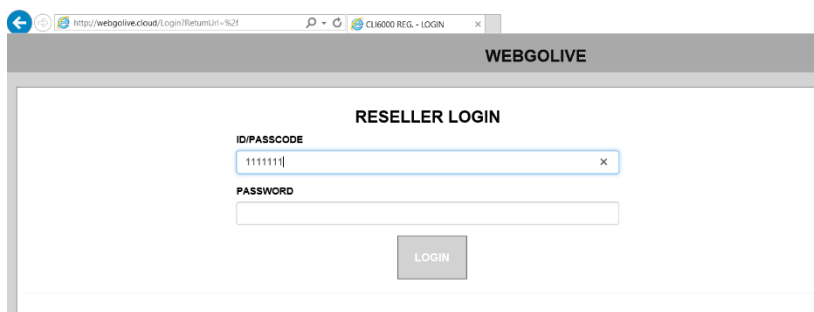

- a) Using a web browser on your computer (webgolive.cloud)*
- b) Using an internet-connected mobile phone with a QR reader*

To run the station, you need an ID / Passcode given by Marelli for a distributor / service technician. Each Passcode is assigned individually by Marelli Workshop Equipment department.

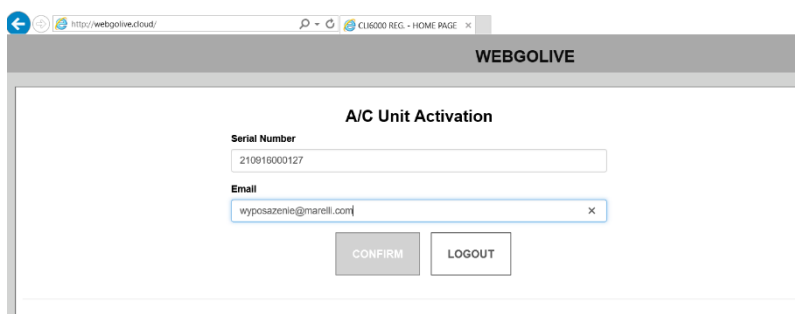

A. Running on a computer: enter webgolive.cloud website address in the web browser

Enter the ID/Passcode

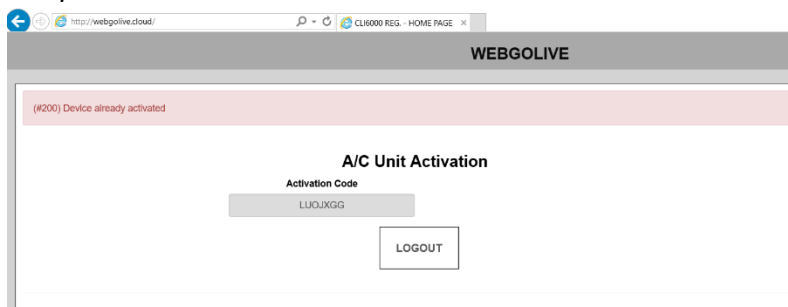

Confirm pressing LOGIN (there's no need to enter any Password, this field may remain empty)

Enter the device serial number (can be found on the back of the station, on the right side), workshop / technician email address.

Enter the Activation Code password into the device.

B. Activation via a mobile phone

Turn on the QR code reader on the phone, be sure to have an active internet connection. Direct the phone to the QR code of the air conditioning station (sticker on rear right side of the station), after reading the QR code you will be redirected to the website **webgolive.cloud**

Enter the access code obtained from Marelli, confirm pressing **LOGIN** (there's no need to enter any Password, this field may remain empty). The serial number of the device will be displayed (based on the QR code). Enter the workshop or person with access to the station e-mail address. Confirm. Enter the received password into the station.
